

The CEU360.com learning solution is powered by cutting edge technology and innovation. Our technologically advanced content delivery system enables a rich learning environment free from many of the headaches that plague most online delivery mediums, such as, limited media types, extensive buffering, sub-par audio quality, and poor presentation. And best of all our agile solution requires no glamorous IT department. With minimal training to use and deploy, the CEU360.com learning solution is a simple choice that fulfills your education and training needs.

Content Delivery

- **Media & Delivery** - CEU360.com's presentation isn't your average powerpoint or WebEx presentation - CEU360.com's engaging media rich presentation includes demonstrative video, informational charts, graphs and diagrams, visualization of the course presenter, and top-quality audio.
- **Live & On-Demand** – Need the ability to present a course live? No problem, our team can help you create and administer a live event, including virtual conferences complete with video, audio, source switching and more! After the live presentation, attendees will have lifelong access to the event on-demand at their leisure.

Content Creation

- **Rapid Content Creation** – Create custom new training and/or compliance courses in a matter of days without cutting any corners. Our technologically advanced content creation platform and tools allow for the rapid creation of customized content, while meeting the needs of all three learning types - visual, auditory and kinesthetic. Ensure your library remains up-to-date through the ability to request new content as you see needs arise.

IT Requirements?

- **No IT** – With our cloud-based learning management solution, there's no need to involve IT – just log in to get started.
- **Unlimited Storage** - No matter how large your course library, storage remains free with your service.
- **Smart Streaming** - Whether you have the connectivity of an information super highway, or that of a country gravel road, our smart streaming technology delivers a rich experience - every time.
- **Branded University** – Our design experts can quickly brand your custom content and your system to seamlessly integrate with your organization's look and feel.
- **Content Delivery Network** - Our network of state-of-the-art data centers allow us to seamlessly and reliably deliver content nationwide

Support

- **Support** – Our knowledgeable help team is available 7 days per week, from 7am - 10pm CST to assist your students with anything! Our help team is trained on accreditation rules, regulations, requirements, and can assist with any technical issues.

“This is the first on line course I have ever attempted and I like it because the format allows me to stop and repeat and study etc. unlike live courses where one might be scrambling to take notes and listen and trying to understand new or different concepts or techniques. Since I am a novice at the computer it was very helpful to be able to call in and get assistance even for stupid questions.”

- Dale Malstrom, PT, Wyoming
